

Mexico

Total no. of Botanic Gardens recorded in Mexico: 89.

Approx. no. of living plant accessions recorded in these botanic gardens: Unknown but probably c.100,000

Approx. no. of taxa in these collections: Unknown but perhaps 10,000 (8,000 spp.).

Estimated % of pre-CBD collections: 80%.

Notes: The Mexican Association of Botanic Gardens (Asociación Mexicana de Jardines Botánicos) actively supports gardens in each vegetation type and state to cultivate native plants. For instance, there are 17 gardens in xerophytic habitats which represents 50% of the area and 20% of the total flora of Mexico. This area is dominated by cacti and xerophytic monocyledons (Agave, Yucca, Dasylirion, Nolina spp. and Bromeliaceae). Other gardens are at high altitudes with coniferous forest (4), tropical forest (3), tropical deciduous forest (9) which represents about 61% flora. Several gardens cultivate species of economic use both native and introduced.

Location: AGUASCALIENTES

Founded: Unknown

Garden Name: Jardín Botánico "Rey Netzahualcóyotl"

Address: Universidad Autónoma de Aguascalientes, Av. Universidad 940 Fracc. Los Bosques 20100, Aguascalientes

Status: University

Herbarium: Unknown
